

Built to Perform. Engineered to Last.

**Custom Cable & Connectivity Solutions
for Rugged OEM Applications**

Solving OEM Challenges in the Harshest Environments

When your equipment operates in extreme conditions, reliability isn't optional—it's essential. Paige OEM partners with manufacturers across demanding industries like Food & Beverage, Oil & Gas, Material Handling, Mining, Medical, EV, Agriculture, Commercial Landscaping, Construction, and Submersible Pump to deliver connectivity solutions that perform under pressure.

Why OEMs Trust Paige

We understand the complexities of OEM manufacturing—and we're built to support them. Here's how we help you stay ahead:

- Engineered for Harsh Conditions: Our cables and assemblies maintain connectivity through heat, moisture, abrasion, and constant motion.
- Application-Specific Expertise: We design solutions tailored to your equipment's unique requirements—no matter the industry.
- Streamlined Supply Chains: Durable, high-quality components that reduce downtime and extend product life.
- Dedicated Engineering Support: Our in-house team specializes in OEM harnesses and assemblies, backed by decades of cross-industry experience.
- 65+ Years of Proven Performance
- Responsive Customer Service and Support
- ISO 9001:2015 certified

Customized Product Solutions

From concept to production, we solve complex wiring challenges with precision-engineered solutions:

- **Battery & Flex Cable Assemblies**

Compact, flexible, and reliable—ideal for mobile, medical, and industrial equipment.

- **Over-Molded Cables**

Built for durability and protection against moisture, contaminants, and repeated motion.

- **Wire Harnesses**

Customized for each application to ensure fast installation, electrical integrity, and long-term reliability.

- **Power Cords & Assemblies**

From standard to complex configurations, we meet certification and performance standards.

- **Databus Assemblies**

Noise-resistant, high-speed communication solutions for critical control systems.

- **C-Track Flex Cables**

Designed for dynamic environments—delivering long flex life and consistent performance.

Value-Added Services

Your Engineering Partner from Start to Finish

We don't just supply products—we become an extension of your team. Our full-service design, development, and testing capabilities help you:

- Accelerate time to market
- Reduce costs
- Improve equipment reliability

Comprehensive Services Include:

- Custom cable design & testing
- PPAP process & EDI compliance
- Coil cord & harness production
- Cellular manufacturing & MRP integration
- Injection molding (thermoplastic & rubber)
- Kitting, labeling & packaging
- Sustainability & recycling programs

Let's Build Something That Lasts

Partner with Paige OEM for engineering design, product development, and performance testing that keeps your equipment connected and your business moving.
